

Running a Basic program from Assembler

Sometimes it is necessary to run a Basic program from assembler code. To do this, it's a good idea to do a full [Kernal/Basic initialization](#) before.

```
PRGEND = $1234      ; end of the Basic program

    LDA #<PRGEND
    STA $2D
    STA $AE
    LDA #>PRGEND
    STA $2E
    STA $AF

    JSR $A659
    JSR $A533      ; Rechain Lines
    JMP $A7AE      ; Basic Warm Start
```
